FROM THE DESK OF THE TECHNICAL DIRECTOR

Alberta Soccer Announces Partnership with New Educational Coaching Tool

November 14, 2007

To all Districts,

The Alberta Soccer Association Board of Directors is endorsing Skillstorm as an educational tool for certified coaches in the province of Alberta to assist player development.

The online tool contains video footage of 20 practice sessions from the Bayern Munich U11 to U17 youth soccer academy teams. The practices are broken down at various speeds with several features, allowing coaches to pick out elements to use in their own team practices. Bayern Munich is considered as one of the top 10 soccer clubs in the world and has produced some of the top youth players who then go on to play for their national teams, including Calgary's own, Owen Hargreaves.

To have access to this valuable tool, coaches must attend and pass a CSA/ASA Coaching Certification Course or have already passed a certification course with Alberta Soccer. Coaches will then have access to material designated for their specific age group.

For more information, contact the Alberta Soccer Technical Operations Coordinator, Anthony Traficante at 780-378-8101.

Kind Regards,

Neil Turnbull
